Subject Index

Volume 36, July–December 2000

A

Adducin
Hypertension in β-Adducin-Deficient Mice, 449
Adenosine
Cardiac Fibroblasts Express the cP-Adenosine Pathway, 337
Adenosine triphosphate
Capacity for Purinergic Control of Renin Promoter via $P2Y_{11}$ Receptor and cP Pathways, 1093
Adipose tissue
Ethnic Differences in Insulinemia and Sympathetic Tone as Links Between Obesity and Blood Pressure, 531
Adrenal gland
Mammalian Bufadienolide Is Synthesized From Cholesterol in the Adrenal Cortex by a Pathway That Is Independent of Cholesterol Side-Chain Cleavage, 442
Adrenergic agonists
Increased Vascular Adrenergic Vasoconstriction and Decreased Vasodilation in Blacks: Additive Mechanisms Leading to Enhanced Vascular Reactivity, 945
Adrenergic receptor agonists
β-Adrenoceptor Dysfunction After Inhibition of NO Synthesis, 376
Adrenergic receptor blockers
Effect of Antihypertensive Therapy on Renal Injury in Type 2 Diabetic Rats With Hypertension, 233
Adrenocorticotropic hormone
Functional Adrenocorticotropic Hormone Receptor in Cultured Human Vascular Endothelial Cells: Possible Role in Control of Blood Pressure, 862
Adrenomedullin
Adrenomedullin and Nitric Oxide Inhibit Human Endothelial Cell Apoptosis via a Cyclic GMP-Independent Mechanism, 83
Adrenomedullin Gene Delivery Attenuates Hypertension; Cardiac Remodeling; and Renal Injury in Deoxycorticosterone Acetate-Salt Hypertensive Rats, 995
Hemodynamic; Hormone; and Urinary Effects of Adrenomedullin Infusion in Essential Hypertension, 588
Age
Hypertension and Its Treatment in Postmenopausal Women: Baseline Data from the Women's Health Initiative, 780
Telomere Length Inversely Correlates With Pulse Pressure and Is Highly Familial, 195
Aging
Angiotensin-Converting Enzyme Inhibitor Prevents Age-Related Endothelial Dysfunction, 581
Cognitive Performance in Hypertensive and Normotensive Older Subjects, 1079
Coronary Vasodilator Capacity and Epicardial Vessel Remodeling in Physiological and Hypertensive Hypertrophy, 343
Estrogen Replacement Reduces Age-Associated Remodeling in Rat Mesenteric Arteries, 970
Systolic and Diastolic Blood Pressure, Pulse Pressure, and Mean Arterial Pressure as Predictors of Cardiovascular Disease Risk in Men, 801
Albuminuria
Effect of Antihypertensive Therapy on Renal Injury in Type 2 Diabetic Rats With Hypertension, 233
Effect of Bosentan on NF-κB; Inflammation; and Tissue Factor in Angiotensin II-Induced End-Organ Damage, 282
Transforming Growth Factor β in Hypertensives With Cardiorenal Damage, 517
Alcohol
Prevalence and Risk Factors of Silent Cerebral Infarction in Apparently Normal Adults, 73
Aldosterone
Beneficial Renal and Hemodynamic Effects of Omapatrilat in Mild and Severe Heart Failure, 523
Cardiac Aldosterone Production in Genetically Hypertensive Rats, 495
Amlodipine
Efficacy of Candesartan Cilexetil Alone or in Combination With Amlodipine and Hydrochlorothiazide in Moderate-to-Severe Hypertension, 454
Angiotensin
Angiotensin in the Nucleus Tractus Solitarii Contributes to Neurogenic Hypertension Caused by Chronic Nitric Oxide Synthase Inhibition, 259
Beneficial Renal and Hemodynamic Effects of Omapatrilat in Mild and Severe Heart Failure, 523
Effect of Angiotensin II Blockade on Renal Injury in Mineralocorticoid-Salt Hypertension, 569
Effect of Enalapril on Exhaled Nitric Oxide in Normotensive and Hypertensive Subjects, 934
Effects of the N-Terminal Sequence of ACE on the Properties of Its C-Domain, 116
Important Role of Angiotensin II-Mediated c-Jun NH_2-Terminal Kinase Activation in Cardiac Hypertrophy in Hypertensive Rats, 511
Renin-Angiotensin System Blockade Improves Endothelial Dysfunction in Hypertension, 575
Retinal Neovascularization Is Prevented by Blockade of the Renin-Angiotensin System, 1099
Angiotensin antagonist
Efficacy of Candesartan Cilexetil Alone or in Combination With Amlodipine and Hydrochlorothiazide in Moderate-to-Severe Hypertension, 454
Transforming Growth Factor β in Hypertensives With Cardiorenal Damage, 517
Angiotensin-converting enzyme
α-Adducin and Angiotensin I-Converting Enzyme Polymorphisms in Essential Hypertension, 990
Bradykinin B_2 Receptor Antagonism Attenuates Blood Pressure Response to Acute Angiotensin-Converting Enzyme Inhibition in Normal Men, 132
Hypothesis Regarding the Pathophysiological Role of Alternative Pathways of Angiotensin II Formation in Atherosclerosis, 638
Interaction of the A D Allele and the GNB3 825T Allele in Myocardial Infarction, 986
Angiotensin-converting enzyme inhibitors
Effect of Antihypertensive Therapy on Renal Injury in Type 2 Diabetic Rats With Hypertension, 233
Effects of Angiotensin-Converting Enzyme Inhibitors on Glucose Uptake, 239
Effects of the N-Terminal Sequence of ACE on the Properties of Its C-Domain, 116
Molecular Plasticity of Vascular Wall During N^G-Nitro-L-Arginine Methyl Ester-Induced Hypertension: Modulation of Proinflammatory Signals, 103
Repair of Coronary Arterioles After Treatment With Perindopril in Hypertensive Heart Disease, 220
Angiotensin I
α-Adducin and Angiotensin I-Converting Enzyme Polymorphisms in Essential Hypertension, 990
Action of Angiotensin II on DNA Synthesis by Human Saphenous Vein in Organ Culture, 917
Effect of Bosentan on NF-κB; Inflammation; and Tissue Factor in Angiotensin II-Induced End-Organ Damage, 282
Angiotensin II
Action of Angiotensin II on DNA Synthesis by Human Saphenous Vein in Organ Culture, 917
Angiotensin II Activates Collagen I Gene Through a Mechanism Involving the P/ER Kinase Pathway, 330
Angiotensin II-Induced Hypertension: Contribution of Ras GTPase/Mitogen-Activated Protein Kinase and Cytochrome P450 Metabolites, 604
Angiotensin II Infused Intrarenally Causes Preglomerular Vascular Changes and Hypertension, 839

Angiotensin II Sensitivity Is Associated With the Angiotensin II Type 1 Receptor $A^{1166}C$ Polymorphism in Essential Hypertensives on a High Sodium Diet, 411
Angiotensin II Stimulates Extracellular Signal-Regulated Kinase Activity in Intact Pressurized Rat Mesenteric Resistance Arteries, 617
Angiotensin II Type 2 Receptors Stimulate Collagen Synthesis in Cultured Vascular Smooth Muscle Cells, 845
Blockade of the Renin-Angiotensin and Endothelin Systems on Progressive Renal Injury, 561
CC Chemokine Receptor 2 Is Required for Macrophage Infiltration and Vascular Hypertrophy in Angiotensin II-Induced Hypertension, 360
Contribution of Angiotensin-(1-7) to Blood Pressure Regulation in Salt-Depleted Hypertensive Rats, 417
Development of Hypertension Induced by Subpressor Infusion of Angiotensin II: Role of Sensory Nerves, 549
Effect of Angiotensin II Antagonist Eprosartan on Hyperglycemia-Induced Activation of Intrarenal Renin-Angiotensin System in Healthy Humans, 122
Enhanced Expression of Angiotensin II Type 2 Receptor; Inositol 1:4;5-Trisphosphate Receptor, and Protein Kinase Cε During Cardioprotection Induced by Angiotensin II Type 2 Receptor Blockade, 506
Mechanisms of Increased Susceptibility to Angiotensin II-Induced Apoptosis in Ventricular Cardiomyocytes of Spontaneously Hypertensive Rats, 1065
Renal Hemodynamic and Hormonal Responses to the Angiotensin II Antagonist Candesartan, 834
Renovascular Hypertension: Structural Changes in the Renal Vasculature, 648

Angiotensinogen
Combinations of Variations in Multiple Genes Are Associated With Hypertension, 2

Anions
Molecular Plasticity of Vascular Wall During N^G-Nitro-L-Arginine Methyl Ester-Induced Hypertension: Modulation of Proinflammatory Signals, 103

Annexins
DNA Synthesis and Apoptosis in Smooth Muscle Cells From a Model of Genetic Hypertension, 110

Antihypertensive agents
Effect of Antihypertensive Therapy on Renal Injury in Type 2 Diabetic Rats With Hypertension, 233
Hypertension and Its Treatment in Postmenopausal Women: Baseline Data from the Women's Health Initiative, 780
Trends in Antihypertensive Drug Therapy of Ambulatory Patients by US Office-Based Physicians, 600

Antihypertensive therapy
Differential Control of Systolic and Diastolic Blood Pressure: Factors Associated With Lack of Blood Pressure Control in the Community, 594

Antioxidants
Ascorbic Acid and Glutathione Modulate the Biological Activity of S-Nitrosoglutathione, 291
Effect of Antioxidant Therapy on Blood Pressure and NO Synthase Expression in Hypertensive Rats, 957
Induction of Oxidative Stress by Glutathione Depletion Causes Severe Hypertension in Normal Rats, 142
Probucol Reduces Oxysterol Formation in Hypertensive Rabbits, 436
Troglitazone Reduces Reactive Oxygen Species Generation by Leukocytes and Lipid Peroxidation and Improves Flow-Mediated Vasodilatation in Obese Subjects, 430

Antithrombin III
Relationship of Fibrinogen Levels and Hemostatic Abnormalities With Organ Damage in Hypertension, 978

Apoptosis
Adrenomedullin and Nitric Oxide Inhibit Human Endothelial Cell Apoptosis via a Cyclic GMP-Independent Mechanism, 83
Blood Flow Regulates the Development of Vascular Hypertrophy: Smooth Muscle Cell Proliferation, and Endothelial Cell Nitric Oxide Synthase in Hypertension, 89
DNA Synthesis and Apoptosis in Smooth Muscle Cells From a Model of Genetic Hypertension, 110
Docosahexaenoic Acid; a Peroxisome Proliferator-Activated Receptor-α Ligand; Induces Apoptosis in Vascular Smooth Muscle Cells by Stimulation of p38 Mitogen-Activated Protein Kinase, 851
Mechanisms of Increased Susceptibility to Angiotensin II-Induced Apoptosis in Ventricular Cardiomyocytes of Spontaneously Hypertensive Rats, 1065

Arachidonic acid
Cytochrome P450-Dependent Renal Arachidonic Acid Metabolism in Desoxycorticosterone Acetate-Salt Hypertensive Mice, 610
Effects of the N-Terminal Sequence of ACE on the Properties of Its C-Domain, 116

Arginine
Enhanced NO Inactivation and Hypertension Induced by a High-Fat; Refined-Carbohydrate Diet, 423

Arterial pressure
Heterozygous Knock-Out of ET_B Receptors Induces BQ-123-Sensitive Hypertension in the Mouse, 1002

Arterial stiffness
Arterial Stiffness as Underlying Mechanism of Disagreement Between an Oscillometric Blood Pressure Monitor and a Sphygmomanometer, 484

Arteries
Angiotensin-Converting Enzyme Inhibitor Prevents Age-Related Endothelial Dysfunction, 581
Impact of Arterial Stiffening on Left Ventricular Structure, 489
Nifedipine Increases Cytochrome P4502C Expression and Endothelium-Derived Hyperpolarizing Factor-Mediated Responses in Coronary Arteries, 270
Quantification of the Contribution of Cardiac and Arterial Remodeling to Hypertension, 760
Renin-Angiotensin System Blockade Improves Endothelial Dysfunction in Hypertension, 575

Arterioles
Renovascular Hypertension: Structural Changes in the Renal Vasculature, 648
Repair of Coronary Arterioles After Treatment With Perindopril in Hypertensive Heart Disease, 220

Arteriosclerosis
Impact of Arterial Stiffening on Left Ventricular Structure, 489

Atherosclerosis
Circulating Heat Shock Protein 60 Is Associated With Early Cardiovascular Disease, 303
Fluvastatin Inhibits Matrix Metalloproteinase-1 Expression in Human Vascular Endothelial Cells, 325
Fluvastatin Upregulates Inducible Nitric Oxide Synthase Expression in Cytokine-Stimulated Vascular Smooth Muscle Cells, 923
Hypothesis Regarding the Pathophysiological Role of Alternative Pathways of Angiotensin II Formation in Atherosclerosis, 638

Atrial natriuretic factor
Increase in $G_{i\alpha}$ Protein Accompanies Progression of Post-Infarction Remodeling in Hypertensive Cardiomyopathy, 42

Autonomic nervous system
Decreased Cardiopulmonary Baroreflex Sensitivity in Chagas' Heart Disease, 1035
Effects of Spinal Section and of Positive-Feedback Excitatory Reflex on Sympathetic and Heart Rate Variability, 1029
Ethnic Differences in Insulinemia and Sympathetic Tone as Links Between Obesity and Blood Pressure, 531
Nitric Oxide and Cardiac Autonomic Control in Humans, 264

B

Baroreceptors
Adrenergic and Reflex Abnormalities in Obesity-Related Hypertension, 538
Central Cardiovascular Action of Neuropeptide Y in Conscious Rabbits, 1040
Decreased Cardiopulmonary Baroreflex Sensitivity in Chagas' Heart Disease, 1035
Endogenous Circulating Sympatholytic Factor in Orthostatic Intolerance, 553

Exercise Training Increases Baroreceptor Gain Sensitivity in Normal and Hypertensive Rats, 1018
Nitric Oxide and Cardiac Autonomic Control in Humans, 264

Baroreflex
Decreased Cardiopulmonary Baroreflex Sensitivity in Chagas' Heart Disease, 1035
Interaction of Carbon Dioxide and Sympathetic Nervous System Activity in the Regulation of Cerebral Perfusion in Humans, 383
Lacidipine and Blood Pressure Variability in Diabetic Hypertensive Patients, 622

Behavior
Personality Type and Neural Circulatory Control, 830

Blacks
Brachial Vascular Reactivity in Blacks, 866
Combinations of Variations in Multiple Genes Are Associated With Hypertension, 2
Genetic Determinants of Hypertension: Identification of Candidate Phenotypes, 7
Hypertension in Black Patients: An Emerging Role of the Endothelin System in Salt-Sensitive Hypertension, 62
Increased Vascular Adrenergic Vasoconstriction and Decreased Vasodilation in Blacks: Additive Mechanisms Leading to Enhanced Vascular Reactivity, 945

Blood flow
β_2-Adrenoceptor Polymorphism Determines Vascular Reactivity in Humans, 371
Blood Flow Regulates the Development of Vascular Hypertrophy: Smooth Muscle Cell Proliferation, and Endothelial Cell Nitric Oxide Synthase in Hypertension, 89

Blood pressure
Angiotensin in the Nucleus Tractus Solitarii Contributes to Neurogenic Hypertension Caused by Chronic Nitric Oxide Synthase Inhibition, 259
Application of Supercritical Fluid Chromatography to Characterize a Labile Digitalis-Like Factor, 1059
Baseline Characteristics in Relation to Electrocardiographic Left Ventricular Hypertrophy in Hypertensive Patients: The Losartan Intervention For Endpoint Reduction (LIFE) in Hypertension Study, 766
Blood Pressure Is Associated With Body Mass Index in Both Normal and Obese Children, 165
Blood Pressure Patterns in Normal Pregnancy; Gestational Hypertension; and Preeclampsia, 149
Bradykinin B_2 Receptor Antagonism Attenuates Blood Pressure Response to Acute Angiotensin-Converting Enzyme Inhibition in Normal Men, 132
Cognitive Performance in Hypertensive and Normotensive Older Subjects, 1079
Consistency of Hemodynamic Responses to Cold Stress in Adolescents, 1013
Contribution of Angiotensin-(1-7) to Blood Pressure Regulation in Salt-Depleted Hypertensive Rats, 417
Cushing, Cortisol, and Cardiovascular Disease, 912
Differential Control of Systolic and Diastolic Blood Pressure: Factors Associated With Lack of Blood Pressure Control in the Community, 594
Effect of Indomethacin on Blood Pressure Lowering by Captopril and Losartan in Hypertensive Patients, 461
Evidence for a Gene Influencing Blood Pressure on Chromosome 17: Genome Scan Linkage Results for Longitudinal Blood Pressure Phenotypes in Subjects From the Framingham Heart Study, 477
Evidence for Genetic Factors Explaining the Birth Weight-Blood Pressure Relation: Analysis in Twins, 1008
Fetal and Childhood Growth and Hypertension in Adult Life, 790
Fetal Growth and Early Postnatal Growth Are Related to Blood Pressure in Adults, 795
Genetic and Environmental Influences on Left Ventricular Mass: A Family Study, 740
Hemodynamic; Hormone; and Urinary Effects of Adrenomedullin Infusion in Essential Hypertension, 588
High Triglycerides and Low HDL Cholesterol and Blood Pressure and Risk of Ischemic Heart Disease, 226
Hypertension and Its Treatment in Postmenopausal Women: Baseline Data from the Women's Health Initiative, 780
Hypertension Risk Status and Effect of Caffeine on Blood Pressure, 137
Impact of Arterial Stiffening on Left Ventricular Structure, 489
Implications of Pulse Pressure as a Predictor of Cardiac Risk in Patients With Hypertension, 907
Improvement in Midwall Myocardial Shortening With Regression of Left Ventricular Hypertrophy, 755
Induction of Oxidative Stress by Glutathione Depletion Causes Severe Hypertension in Normal Rats, 142
Nifedipine Prevents Changes in Nitric Oxide Synthase mA Levels Induced by Cyclosporine, 642
Nitric Oxide and Cardiac Autonomic Control in Humans, 264
Nitric Oxide Limits Pressor Responses to Sympathetic Activation in Rat Spinal Cord, 1089
NOS3 Glu298Asp Genotype and Blood Pressure Response to Endurance Training: The HERITAGE Family Study, 885
Personality Type and Neural Circulatory Control, 830
Possible Locus on Chromosome 18q Influencing Postural Systolic Blood Pressure Changes, 471
Proximal Sodium Reabsorption: An Independent Determinant of Blood Pressure Response to Salt, 631
Relation Between Serum Uric Acid and Risk of Cardiovascular Disease in Essential Hypertension: The PIU Study, 1072
Relationship Between Skin Color and Blood Pressure in Egyptian Adults: Results From the National Hypertension Project, 296
Renal Protein Phosphatase 2A Activity and Spontaneous Hypertension in Rats, 1053
Renin-Angiotensin System Blockade Improves Endothelial Dysfunction in Hypertension, 575
Resting Metabolic Rate and Substrate Use in Obesity Hypertension, 26
Salt, Blood Pressure, and Human Health, 890
Systolic and Diastolic Blood Pressure, Pulse Pressure, and Mean Arterial Pressure as Predictors of Cardiovascular Disease Risk in Men, 801
Telomere Length Inversely Correlates With Pulse Pressure and Is Highly Familial, 195

Blood pressure monitoring
Arterial Stiffness as Underlying Mechanism of Disagreement Between an Oscillometric Blood Pressure Monitor and a Sphygmomanometer, 484
Relation Between Serum Uric Acid and Risk of Cardiovascular Disease in Essential Hypertension: The PIU Study, 1072

Blood pressure monitoring, ambulatory
Ambulatory Blood Pressure Monitoring and Organ Damage, 894
Lacidipine and Blood Pressure Variability in Diabetic Hypertensive Patients, 622
Prognostic Significance of Blood Pressure and Heart Rate Variabilities: The Ohasama Study, 901

Blood vessels
Ascorbic Acid and Glutathione Modulate the Biological Activity of S-Nitrosoglutathione, 291
Transient Hypertension Directly Impairs Endothelium-Dependent Vasodilation of the Human Microvasculature, 941

Body height
Fetal Growth and Early Postnatal Growth Are Related to Blood Pressure in Adults, 795

Body mass index
Blood Pressure Is Associated With Body Mass Index in Both Normal and Obese Children, 165
Modulation of Blood Pressure and Obesity With the Dopamine D2 Receptor Gene TaqI Polymorphism, 177

Body weight
Genetic and Environmental Influences on Left Ventricular Mass: A Family Study, 740

Bradykinin
Augmented Sympathetic Response to Bradykinin in the Diabetic Heart Before Autonomic Denervation, 208
Bradykinin B_2 Receptor Antagonism Attenuates Blood Pressure Response to Acute Angiotensin-Converting Enzyme Inhibition in Normal Men, 132
Bradykinin B_2 Receptor Gene Polymorphism Is Associated With Angiotensin-Converting Enzyme Inhibitor-Related Cough, 127
Bradykinin B_1 Receptor Mediates Inhibition of Neointima Formation in Rat Artery After Balloon Angioplasty, 364

Effect of Enalapril on Exhaled Nitric Oxide in Normotensive and Hypertensive Subjects, 934
Effects of Angiotensin-Converting Enzyme Inhibitors on Glucose Uptake, 239
Effects of Bradykinin on Prostaglandin I_2 Synthesis in Human Vascular Endothelial Cells, 201
Effects of the N-Terminal Sequence of ACE on the Properties of Its C-Domain, 116
Brain
Angiotensin in the Nucleus Tractus Solitarii Contributes to Neurogenic Hypertension Caused by Chronic Nitric Oxide Synthase Inhibition, 259
Cardiac Ankyrin Repeat Protein Is a Novel Marker of Cardiac Hypertrophy: Role of M-CAT Element Within the Promoter, 48
Cushing, Cortisol, and Cardiovascular Disease, 912
Overexpression of eNOS in NTS Causes Hypotension and Bradycardia In Vivo, 1023

C

Caffeine
Hypertension Risk Status and Effect of Caffeine on Blood Pressure, 137
Calcium
Effects of Angiotensin-Converting Enzyme Inhibitors on Glucose Uptake, 239
Effects of Bradykinin on Prostaglandin I_2 Synthesis in Human Vascular Endothelial Cells, 201
Effects of the N-Terminal Sequence of ACE on the Properties of Its C-Domain, 116
Endothelin and Prostaglandin H_2/Thromboxane A_2 Enhance Myogenic Constriction in Hypertension by Increasing Ca^{2+} Sensitivity of Arteriolar Smooth Muscle, 856
Leptin Attenuates Cardiac Contraction in Rat Ventricular Myocytes: Role of NO, 501
Polymorphonuclear Integrins; Membrane Fluidity; and Cytosolic Ca^{2+} Content After Activation in Essential Hypertension, 813
Calcium antagonists
Lacidipine and Blood Pressure Variability in Diabetic Hypertensive Patients, 622
Candesartan
Efficacy of Candesartan Cilexetil Alone or in Combination With Amlodipine and Hydrochlorothiazide in Moderate-to-Severe Hypertension, 454
Renal Hemodynamic and Hormonal Responses to the Angiotensin II Antagonist Candesartan, 834
Captopril
Effect of Indomethacin on Blood Pressure Lowering by Captopril and Losartan in Hypertensive Patients, 461
Carbon dioxide
Interaction of Carbon Dioxide and Sympathetic Nervous System Activity in the Regulation of Cerebral Perfusion in Humans, 383
Cardiac Fibroblasts Express the cP-Adenosine Pathway, 337
Cardiac output
Consistency of Hemodynamic Responses to Cold Stress in Adolescents, 1013
Hemodynamic; Hormone; and Urinary Effects of Adrenomedullin Infusion in Essential Hypertension, 588
Cardiac remodeling
Beneficial Renal and Cardiac Effects of Vasopeptidase Inhibition With S21402 in Heart Failure, 1105
Cardiac Fibroblasts Express the cP-Adenosine Pathway, 337
Cardiomyopathy
Can Serum Carnitine Levels Distinguish Hypertrophic Cardiomyopathy From Hypertensive Hearts? 215
Cardiovascular diseases
Decreased Cardiopulmonary Baroreflex Sensitivity in Chagas' Heart Disease, 1035
Hypothesis Regarding the Pathophysiological Role of Alternative Pathways of Angiotensin II Formation in Atherosclerosis, 638
Increase in $G_{i\alpha}$ Protein Accompanies Progression of Post-Infarction Remodeling in Hypertensive Cardiomyopathy, 42
Prognostic Significance of Blood Pressure and Heart Rate Variabilities: The Ohasama Study, 901
Relation Between Serum Uric Acid and Risk of Cardiovascular Disease in Essential Hypertension: The PIU Study, 1072
Cell movement
Bradykinin B_1 Receptor Mediates Inhibition of Neointima Formation in Rat Artery After Balloon Angioplasty, 364
Cells
DNA Synthesis and Apoptosis in Smooth Muscle Cells From a Model of Genetic Hypertension, 110
Docosahexaenoic Acid; a Peroxisome Proliferator-Activated Receptor-α Ligand; Induces Apoptosis in Vascular Smooth Muscle Cells by Stimulation of p38 Mitogen-Activated Protein Kinase, 851
Central nervous system
Central Cardiovascular Action of Neuropeptide Y in Conscious Rabbits, 1040
Cerebral infarction
Prevalence and Risk Factors of Silent Cerebral Infarction in Apparently Normal Adults, 73
Children
Blood Pressure Is Associated With Body Mass Index in Both Normal and Obese Children, 165
Fetal and Childhood Growth and Hypertension in Adult Life, 790
Cholesterol
Genetic Determinants of Hypertension: Identification of Candidate Phenotypes, 7
Mammalian Bufadienolide Is Synthesized From Cholesterol in the Adrenal Cortex by a Pathway That Is Independent of Cholesterol Side-Chain Cleavage, 442
Probucol Reduces Oxysterol Formation in Hypertensive Rabbits, 436
Chromatography
Application of Supercritical Fluid Chromatography to Characterize a Labile Digitalis-Like Factor, 1059
Mammalian Bufadienolide Is Synthesized From Cholesterol in the Adrenal Cortex by a Pathway That Is Independent of Cholesterol Side-Chain Cleavage, 442
Chromogranins
Malignant Pheochromocytoma: Chromaffin Granule Transmitters and Response to Treatment, 1045
Chromosome mapping
Possible Locus on Chromosome 18q Influencing Postural Systolic Blood Pressure Changes, 471
Circadian rhythm
Blood Pressure Patterns in Normal Pregnancy: Gestational Hypertension; and Preeclampsia, 149
Circulation
Coronary Vasodilator Capacity and Epicardial Vessel Remodeling in Physiological and Hypertensive Hypertrophy, 343
Clinical trials
Differentiated Long-Term Effects of Intentional Weight Loss on Diabetes and Hypertension, 20
Collagen
Angiotensin II Activates Collagen I Gene Through a Mechanism Involving the P/ER Kinase Pathway, 330
Angiotensin II Type 2 Receptors Stimulate Collagen Synthesis in Cultured Vascular Smooth Muscle Cells, 845
Fluvastatin Inhibits Matrix Metalloproteinase-1 Expression in Human Vascular Endothelial Cells, 325
Repair of Coronary Arterioles After Treatment With Perindopril in Hypertensive Heart Disease, 220
Transforming Growth Factor β in Hypertensives With Cardiorenal Damage, 517
Compliance
Quantification of the Contribution of Cardiac and Arterial Remodeling to Hypertension, 760
Coronary artery disease
Implications of Pulse Pressure as a Predictor of Cardiac Risk in Patients With Hypertension, 907
Renin-Angiotensin System Polymorphisms and Coronary Events in Familial Hypercholesterolemia, 808
Repair of Coronary Arterioles After Treatment With Perindopril in Hypertensive Heart Disease, 220

Systolic and Diastolic Blood Pressure, Pulse Pressure, and Mean Arterial Pressure as Predictors of Cardiovascular Disease Risk in Men, 801

Coronary disease
High Triglycerides and Low HDL Cholesterol and Blood Pressure and Risk of Ischemic Heart Disease, 226

Cortisol
Cushing, Cortisol, and Cardiovascular Disease, 912

Cyclic AMP
Adrenomedullin and Nitric Oxide Inhibit Human Endothelial Cell Apoptosis via a Cyclic GMP-Independent Mechanism, 83
Cardiac Fibroblasts Express the cP-Adenosine Pathway, 337

Cyclooxygenase
Renal Changes Induced by a Cyclooxygenase-2 Inhibitor During Normal and Low Sodium Intake, 276

Cyclosporine
Nifedipine Prevents Changes in Nitric Oxide Synthase mA Levels Induced by Cyclosporine, 642

Cytochrome P450
Angiotensin II-Induced Hypertension: Contribution of Ras GTPase/Mitogen-Activated Protein Kinase and Cytochrome P450 Metabolites, 604
Cardiac Aldosterone Production in Genetically Hypertensive Rats, 495
Cytochrome P450-Dependent Renal Arachidonic Acid Metabolism in Desoxycorticosterone Acetate-Salt Hypertensive Mice, 610
Nifedipine Increases Cytochrome P4502C Expression and Endothelium-Derived Hyperpolarizing Factor-Mediated Responses in Coronary Arteries, 270

Cytokines
Molecular Plasticity of Vascular Wall During N^G-Nitro-L-Arginine Methyl Ester-Induced Hypertension: Modulation of Proinflammatory Signals, 103

Cytoskeleton
Hypertension in β-Adducin–Deficient Mice, 449

D

Deoxycorticosterone
Adrenomedullin Gene Delivery Attenuates Hypertension; Cardiac Remodeling; and Renal Injury in Deoxycorticosterone Acetate-Salt Hypertensive Rats, 995

Diabetes mellitus
Augmented Sympathetic Response to Bradykinin in the Diabetic Heart Before Autonomic Denervation, 208
Differentiated Long-Term Effects of Intentional Weight Loss on Diabetes and Hypertension, 20
Lacidipine and Blood Pressure Variability in Diabetic Hypertensive Patients, 622

Diabetic nephropathy
Effect of Antihypertensive Therapy on Renal Injury in Type 2 Diabetic Rats With Hypertension, 233

Diet
Differentiated Long-Term Effects of Intentional Weight Loss on Diabetes and Hypertension, 20
Enhanced NO Inactivation and Hypertension Induced by a High-Fat; Refined-Carbohydrate Diet, 423
Hypertension Risk Status and Effect of Caffeine on Blood Pressure, 137

Dinucleotide repeats
CA-Repeat Polymorphism in Intron 1 of HSD11B2: Effects on Gene Expression and Salt Sensitivity, 187

DNA
Genetic Variants of Thiazide-Sensitive NaCl-Cotransporter in Gitelman's Syndrome and Primary Hypertension, 389

Docosahexaenoic acid
Docosahexaenoic Acid; a Peroxisome Proliferator-Activated Receptor-α Ligand; Induces Apoptosis in Vascular Smooth Muscle Cells by Stimulation of p38 Mitogen-Activated Protein Kinase, 851

Dopamine
Dopamine$_1$ Receptor; $G_{\alpha s}$, and Na^+-H^+ Exchanger Interactions in the Kidney in Hypertension, 395
Modulation of Blood Pressure and Obesity With the Dopamine D2 Receptor Gene TaqI Polymorphism, 177
Renal Protein Phosphatase 2A Activity and Spontaneous Hypertension in Rats, 1053

Doxorubicin
Cardiac Ankyrin Repeat Protein Is a Novel Marker of Cardiac Hypertrophy: Role of M-CAT Element Within the Promoter, 48

Drug therapy
Implications of Pulse Pressure as a Predictor of Cardiac Risk in Patients With Hypertension, 907
Renin-Angiotensin System Blockade Improves Endothelial Dysfunction in Hypertension, 575

Beneficial Renal and Hemodynamic Effects of Omapatrilat in Mild and Severe Heart Failure, 523
Development of Hypertension Induced by Subpressor Infusion of Angiotensin II: Role of Sensory Nerves, 549
Personality
Personality Type and Neural Circulatory Control, 830
Phenylephrine
Interaction of Carbon Dioxide and Sympathetic Nervous System Activity in the Regulation of Cerebral Perfusion in Humans, 383
Phosphatase
Renal Protein Phosphatase 2A Activity and Spontaneous Hypertension in Rats, 1053
Phospholipases
Effects of Angiotensin-Converting Enzyme Inhibitors on Glucose Uptake, 239
Effects of Bradykinin on Prostaglandin I_2 Synthesis in Human Vascular Endothelial Cells, 201
Placenta
Fetal and Childhood Growth and Hypertension in Adult Life, 790
Plasma
Malignant Pheochromocytoma: Chromaffin Granule Transmitters and Response to Treatment, 1045

Renal Hemodynamic and Hormonal Responses to the Angiotensin II Antagonist Candesartan, 834
Plethysmography
Noninvasive Assessment of the Digital Volume Pulse: Comparison With the Peripheral Pressure Pulse, 952
Polymerase chain reaction
Effects of Bradykinin on Prostaglandin I_2 Synthesis in Human Vascular Endothelial Cells, 201
Polymorphism
α-Adducin and Angiotensin I-Converting Enzyme Polymorphisms in Essential Hypertension, 990
Angiotensin II Sensitivity Is Associated With the Angiotensin II Type 1 Receptor $A^{1166}C$ Polymorphism in Essential Hypertensives on a High Sodium Diet, 411
Bradykinin B_2 Receptor Gene Polymorphism Is Associated With Angiotensin-Converting Enzyme Inhibitor-Related Cough, 127
CA-Repeat Polymorphism in Intron 1 of HSD11B2: Effects on Gene Expression and Salt Sensitivity, 187
Dopamine D1 Receptor Gene Polymorphism Is Associated With Essential Hypertension, 183
Postnatal growth
Fetal Growth and Early Postnatal Growth Are Related to Blood Pressure in Adults, 795
Posture
Possible Locus on Chromosome 18q Influencing Postural Systolic Blood Pressure Changes, 471
Potassium channels
Nifedipine Increases Cytochrome P4502C Expression and Endothelium-Derived Hyperpolarizing Factor-Mediated Responses in Coronary Arteries, 270
Preeclampsia
Blood Pressure Patterns in Normal Pregnancy; Gestational Hypertension; and Preeclampsia, 149
Definitive Molecular Evidence of Renin-Angiotensin System in Human Uterine Decidual Cells, 159
Flow-Mediated Vasodilation and Plasma Fibronectin Levels in Preeclampsia, 400
Mammalian Bufadienolide Is Synthesized From Cholesterol in the Adrenal Cortex by a Pathway That Is Independent of Cholesterol Side-Chain Cleavage, 442
Serum Levels of Vascular Endothelial Growth Factor in Preeclamptic and Normotensive Pregnancy, 965
Pregnancy
Blood Pressure Patterns in Normal Pregnancy; Gestational Hypertension; and Preeclampsia, 149
Definitive Molecular Evidence of Renin-Angiotensin System in Human Uterine Decidual Cells, 159
Prostacyclin
Effects of Bradykinin on Prostaglandin I_2 Synthesis in Human Vascular Endothelial Cells, 201
Prostaglandins
Effects of Bradykinin on Prostaglandin I_2 Synthesis in Human Vascular Endothelial Cells, 201
Renal Changes Induced by a Cyclooxygenase-2 Inhibitor During Normal and Low Sodium Intake, 276
Protein kinases
Angiotensin II Stimulates Extracellular Signal-Regulated Kinase Activity in Intact Pressurized Rat Mesenteric Resistance Arteries, 617
Cardiac Ankyrin Repeat Protein Is a Novel Marker of Cardiac Hypertrophy: Role of M-CAT Element Within the Promoter, 48
Docosahexaenoic Acid: a Peroxisome Proliferator-Activated Receptor-α Ligand; Induces Apoptosis in Vascular Smooth Muscle Cells by Stimulation of p38 Mitogen-Activated Protein Kinase, 851
Effects of Angiotensin-Converting Enzyme Inhibitors on Glucose Uptake, 239
Enhanced Expression of Angiotensin II Type 2 Receptor; Inositol 1:4:5-Trisphosphate Receptor, and Protein Kinase Cε During Cardioprotection Induced by Angiotensin II Type 2 Receptor Blockade, 506
Important Role of Angiotensin II-Mediated c-Jun NH_2-Terminal Kinase Activation in Cardiac Hypertrophy in Hypertensive Rats, 511
Mechanisms of Reduced Nitric Oxide/cGMP-Mediated Vasorelaxation in Transgenic Mice Overexpressing Endothelial Nitric Oxide Synthase, 97
Proteins
Cardiac Ankyrin Repeat Protein Is a Novel Marker of Cardiac Hypertrophy: Role of M-CAT Element Within the Promoter, 48
CC Chemokine Receptor 2 Is Required for Macrophage Infiltration and Vascular Hypertrophy in Angiotensin II-Induced Hypertension, 360
Prothrombin
Relationship of Fibrinogen Levels and Hemostatic Abnormalities With Organ Damage in Hypertension, 978
Pulse
Noninvasive Assessment of the Digital Volume Pulse: Comparison With the Peripheral Pressure Pulse, 952
Telomere Length Inversely Correlates With Pulse Pressure and Is Highly Familial, 195

Q

QT interval
Converting Enzyme Inhibition Normalizes QT Interval in Spontaneously Hypertensive Rats, 350
